

**Beth Drews Schaubroeck**  
**Professor of Mathematical Sciences**  
**United States Air Force Academy**  
**Geneseo Graduate 1988**

Beth Drews Schaubroeck moved to Geneseo in 1977, attended Southwest Elementary School, the old junior high, and Geneseo High School, graduating as valedictorian of the class of 1988. While in high school, she played in the band, was active in theatre support, and was on the speech team. Her favorite classes were usually math and she enjoyed helping friends with math. Because of this, she went to Wartburg College in Waverly, Iowa planning to be a high school math teacher. While in college, Beth decided that she would rather teach college-level students, yet she still completed her Mathematics Education degree, which included student teaching at Waterloo East High School. In 1990, Beth married Tim Schaubroeck (class of 1984). Tim encouraged Beth to continue her education in graduate school right after college, so Beth attended the University of North Carolina at Chapel Hill, earning her Ph.D. in 1998. She and Tim then moved to Colorado Springs, CO, where Beth teaches collegiate mathematics to future Air Force officers at the Air Force Academy. In addition to teaching, Beth has published in mathematics and mathematics education journals. She is also part of a team leading a summer faculty development workshop at the United States Military Academy at West Point, NY. Beth and Tim have two sons, who are now ages 5 and 10. Not surprisingly, both boys show interest and aptitude for mathematics. They're also very involved in sports, and the whole family loves going to Colorado Rockies games.
